Streamcore Technologies Inc. is a Supply Chain technology services company, leading and provisioning strategic IT projects for inventory-based enterprises.

Manufacturing, Wholesale & Retail executives regularly call upon senior Streamcore professionals for their demonstrated 'deep' technical expertise and 'wide' exposure on critical Supply Chain projects.

With over 20 years of cross-industry experience, in both large and small supply chain projects, Streamcore professionals consistently deliver on commitments, creating lasting customer partnerships.

Streamcore's *core expertise* is in extending legacy systems to automate the following functionalities:

- **Business document transformation & exchange:** Implementing technologies such as EDI, XML & SQL, to automate the transformation and exchange of data and business documents between trading partners and/or enterprise divisions.
 - Database replication across the enterprise
 - Providing customer account & catalog access
 - Trading partner & national retailer compliance.
- **Business process automation:** Integrating technologies, such as bar coding, data collection and RF, to automate operational processes and optimize workflow.
 - Product marking & labeling
 - Automation of physical inventory & cycle counts
 - Decrease Inventory & increase fulfillment service levels
 - Warehouse locator & billing models
- **Mobile computing:** Implementation of both remote and on-premise data collection, including Pocket PC devices and utilization of batch and real time communications.
 - Extend networks & data to warehouse and field staff
 - 'Point of Activity' operational computing
 - Support for Event, Logistics & Field professionals

*Symbol, Zebra,
Sterling, TEC*

Streamcore has teamed with leading hardware and software vendors, including Symbol Technologies, Zebra, Sterling Commerce, & TEC, to select and integrate the best 'technology enabling' products into our client's solutions.

Our daily activities are tightly focused on client deliverables and immediate critical support response. Lasting client partnerships fuel our growth and are built through our client services such as;

- Business Process Consulting
- Requirements Definition
- Project Management
- Custom Application Development
- User & Support Training
- Support & On-going Maintenance

Streamcore client partnerships are supported through the consistent delivery of solutions that generate solid returns on investment while maturing the organizations operational processes. We work with our clients' to stage complex implementations and respect the need to extract operational and financial results vs. selling technology.

We invite you to contact us today to discuss how Streamcore can 'enable' your organization's operational processes.
